

DSP3-150

OVERVIEW

The union of pro-audio durability and high-fidelity residential amplification led to the birth of our DSP3 series. The DSP3-150 features two channels at 150w each and one sub channel at 300w. The intentional addition of the third channel was to provide an easy way to control the low-end output of passive subwoofers. With a dedicated DSP curve for the subwoofer, you're able to tune the cross-over point precisely and use specialized processing on the full-range loudspeakers.

PRODUCT ID

SPECS

PART	AMPD03X1500
Channels	3
Output	150 x 150 x 300w @ 4Ω
Digital Input	1 x Optical Stereo
Analog Input	2 x RCA Mono
Dimensions	17 x 3½ x 14" (433 x 88 x 357mm)
